

# 3. A First Script

Now we can run the script with `./first.sh`, and it will print "Hello World" to the terminal. We can also run it with `./first.sh` if we have permissions to do so.

```
$ chmod a+rx first.sh

$ ./first.sh
```

The script prints "Hello World" to the terminal. We can also run it with `./first.sh` if we have permissions to do so.

The script prints "Hello World" to the terminal.

```
#!/bin/sh
# This is a comment!
echo Hello World # This is a comment, too!
```

The script is a shell script. It starts with `#!/bin/sh`, which tells the system to use the `/bin/sh` shell to run the script. This is a common shell for Unix and GNU/Linux systems. Other shells include `bash` and `dash`.

The script is a shell script. It starts with `#!/bin/sh`, which tells the system to use the `/bin/sh` shell to run the script. This is a common shell for Unix and GNU/Linux systems. Other shells include `bash` and `dash`. The script also contains a comment `# This is a comment!` and a command `echo Hello World # This is a comment, too!`.

The script prints "Hello World" to the terminal.

The script prints "Hello World" to the terminal.

The script prints "Hello World" to the terminal.

The script prints "Hello World" to the terminal.

```
$ chmod 755 first.sh $ ./first.sh
Hello World
$
```
